

Visual Music Discovery by Genre and Mood on Android

Visual Music Discovery

Your music collection is displayed within colorful bubbles

The more songs inside a bubble, the larger the bubble

Visual Music Discovery

Overview of
navigation gestures

How to use:

Zoom In
to reveal artists
and albums

Single Tap
to access play and
discovery features

Double Tap
to play

Switch
between display
modes

Visual Music Discovery

Music is grouped by Genre or by Mood

Dual view: Switch between Genre or Mood

E.g. Here the Genre View is selected

Visual Music Discovery

Here the Mood View
is selected

Visual Music Discovery

Single tap on a bubble brings up a **pie menu** that has 3 functions:

Discovery - left side – lets you discover similar artists

Play - center - plays the music associated with the bubble

Reveal - right side - zooms in to show the contents

Visual Music Discovery

Zoom in to show the artists, including relevant images

Press Back (lower right corner) to go back to the previous viewport

Visual Music Discovery

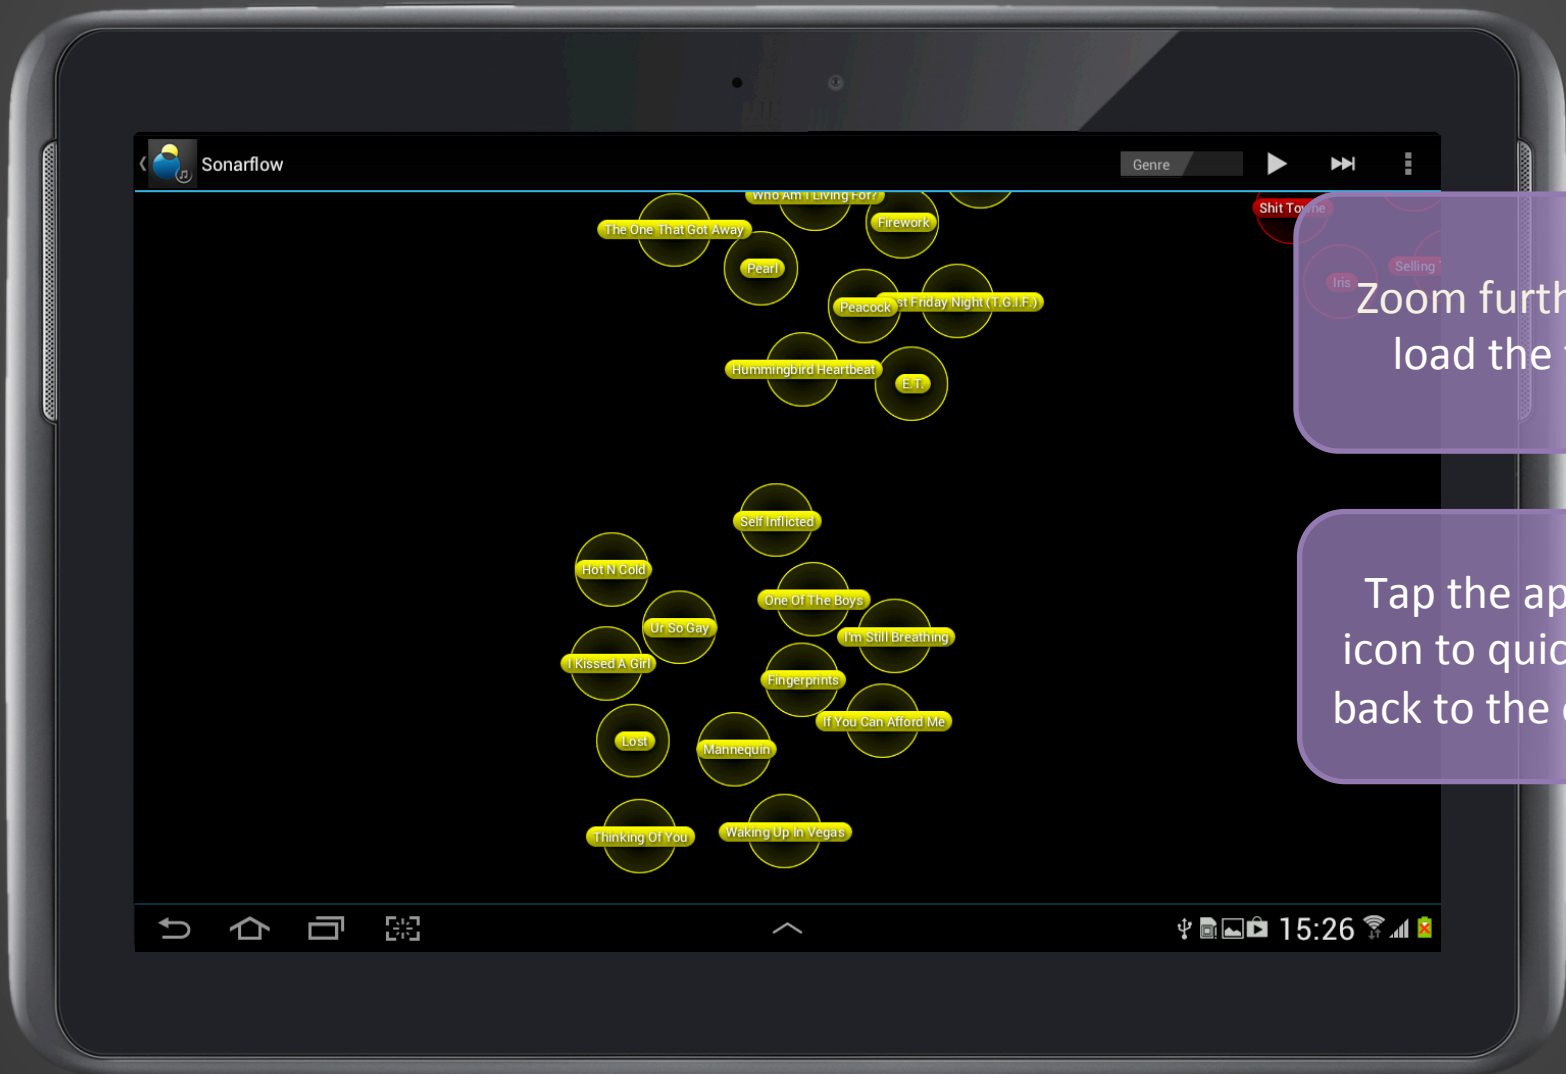

Display five similar artists to a given artist

Double tap on discovery bubbles to listen to track preview

Visual Music Discovery

Visual Music Discovery

Zoom further in to
load the tracks

Tap the app home
icon to quickly zoom
back to the overview.

Visual Music Discovery

On the top right corner – the 3 dots - you can find a menu with the following functions:

Shuffle
Repeat all
Settings
Feedback

Visual Music Discovery

By selecting Settings
- you can scrobble
your listening history
to last.fm
